

Burcham's Metals, Inc.

No PCBs Certification

for Ballast Sales

Instructions

1. This form must be given to the Burcham's Metals, Inc. customer prior to the sale.
2. The customer must inspect each ballast to verify that the ballast contains a "**No PCB**" notation on the label. Electronic ballasts do not contain PCBs but do not have the notation. Electronic ballasts are acceptable to Burcham's Metals, Inc., but must be segregated from the rest of the scrap load in a barrel.
3. All non-PCB ballasts must be separated from the light fixture and segregated from all other scrap metal in a separate container (including electronic ballasts).
4. A representative from the company must sign the certification below and submit this form to Burcham's Metals, Inc. prior to delivery or pickup of the approved ballasts.

Certification of Seller

I certify that all ballasts sold to Burcham's Metals, Inc. contain no polychlorinated biphenyls (PCBs). All ballasts, except for new electronic ballasts, must be labeled "No PCBs." In the absence of a "No PCBs" label, it is assumed that the ballast contains PCBs and will not be accepted by Burcham's Metals, Inc. PCB ballasts or suspected PCB ballasts must be managed in accordance with the Federal Toxic Substances Control Act (40 CFR 761) and disposed of by a licensed hazardous waste contractor.
